

SOLUTIONS FOR OUTDOOR LIVING

COMPOSITE CO-EXTRUDED

Our co-extruded boards are the next generation in composite decking. Each board offers the traditional qualities of composite decking boards with the unparalleled beauty of a deep wood grain ageless look.

Our co-extruded boards are made with a unique multi-textured marble colour effect which gives the boards a vibrant layered appearance and excellent slip resistant qualities. Boards are anti-rot. Unlike other composite products our co-extruded boards have little colour fade ensuring the character of the product will be retained over its lifetime.

Our products are environmentally friendly being only made from 60% responsibly sourced wood (FSC® 100% certified) and 40% reclaimed salvage high density polyethylene plastics with bonding additives. All of our products is **low-maintenance** and incredibly durable due to its composite properties. It is also **UV stable** and suitable for a variety of outdoor uses.

Our textured decking is designed to take away the harshness of a plastic looking product, while emulating the **traditional look and feel of natural wood**.

All boards are covered by 10 year warranty
